SETH BORNE

GIS Developer | GIS Data & Web Applications

Seattle, WA | 617 899 1135 | sethborne@gmail.com | linkedin.com/in/sethborne | sethborne.github.io

SUMMARY

GIS professional with a UW GIS Certificate and 8+ years of JavaScript/Node.js development, specializing in spatial data pipelines and ArcGIS web applications. Led data engineering for a statewide textile reuse and recycling dataset for the Washington State Department of Ecology (3rd place, WAGISA Dick Thomas Award). Volunteer presenter of ArcGIS Online training for Washington teachers through WAGISA YP-SIG. Landscape architecture and 3D visualization background adds design, cartographic, and client communication strength.

SKILLS

GIS: ArcGIS Pro, ArcGIS Online, ArcGIS Enterprise (Portal), Experience Builder, Survey123 (Web Designer and Connect), Map Viewer, Scene Viewer, hosted feature layers and views, definition queries, geocoding, coordinate systems and projections
Data: ETL pipeline design, schema conformance, deduplication and QA/QC, Overture Maps, SQL (MySQL, SQLite), data modeling and ERDs
Development: JavaScript (Node.js, ESM), Python, HTML/CSS, React, Esri Calcite Design System, Git/GitHub, AWS (Lambda, API Gateway, DynamoDB, S3, Cognito)
Design: AutoCAD, 3ds Max, Adobe Creative Suite, custom legend and cartographic graphics

GIS PROJECTS

Washington Textile Reuse & Recycling Mapping, UW GIS Capstone, Data Lead **Jan 2026 – Jun 2026**
Client: Washington State Department of Ecology | **[CAPSTONE PROJECT LINK]**

- Built a Node.js ETL pipeline merging Overture Maps with five supplemental datasets into one Overture-based schema
- Developed local deduplication and human-review web tools (exact, near-match, and needs-review queues with undo) to QA statewide business records
- Wrote ArcGIS Pro import scripts compliant with Ecology GIS standards (NAD83 WA South, EPSG 2927, US Survey Feet)
- Designed a Circularity Composite Index methodology for analysis by legislative district and census tract
- Delivered the final ArcGIS Experience Builder application to the Ecology portal; served as primary client contact for schedules, handoff, and authorship

Washington Textile Connection Survey & Map, Survey123 / Experience Builder Developer **Jun 2026 – Jul 2026**
Client: Washington State Department of Ecology, Solid Waste Management
Portfolio demos: **[SURVEY]** | **[PUBLIC MAP]** | **[ADMIN APP]** *(each links to the live Ecology deployment)*

- Converted a symposium pin map into a statewide, crowd-sourced directory of textile reuse and recycling professionals
- Built the Survey123 form and a public Experience Builder map using eight role-filtered hosted feature layer views, plus an internal admin app for reviewing and editing submissions
- Diagnosed missing view-layer creation on Ecology's ArcGIS Enterprise 11.3 portal with the agency GIS admin; traced to a known Esri bug and applied the workaround
- Resolved multi-select field storage issues by recoding Survey123 choice values, enabling reliable filtering; generated custom legend graphics with Node.js canvas

ArcGIS Pro Dynamic Text Reference, Personal Project **2026**
Searchable reference site for ArcGIS Pro dynamic text tags; Node.js scraper, vanilla JS, Esri Calcite, GitHub Pages | **[LINK]**

GIS LEADERSHIP & COMMUNITY

WAGISA Young Professionals SIG (YP-SIG), Volunteer **Jun 2026 – Present**
Volunteer organization for GIS professionals with under 5 years of experience

Volunteer Presenter, WA DNR Community of Practice | **[RECORDING LINK]**

- Co-planned and co-presented the September 2026 session on essential ArcGIS Online analysis tools for 10 to 12 environmental science teachers, one of 3 YP-SIG presenters
- Taught Summarize Within, Summarize Nearby, Aggregate Points, and Overlay Layers (Intersect, Union, Erase), with worked examples for each tool
- Led an Esri tutorial breakout on tutorial strategies, credit usage monitoring, and 3 known tutorial errors

AWARDS

Richard "Dick" Thomas Award, 3rd Place, WAGISA **2026**
Student presentation competition, 2026 Washington GIS Conference, for the Ecology textile capstone | **[ARTICLE LINK]**

EDUCATION & CERTIFICATIONS

University of Washington, Professional & Continuing Education, Certificate in Geographic Information Systems **2026**
Completed coursework in spatial analysis, data management, and cartographic design using ArcGIS Pro and ArcGIS Online

Coding Dojo, Seattle, WA, Full Stack Web Development Certificate **2017**
MEAN, Python, and C#/.NET Core stacks

Purdue University, West Lafayette, IN, B.S. Landscape Architecture **2001**
Graduated with distinction, GPA 3.87; studied urban and regional planning and sustainability at the Swedish University of Agricultural Sciences (SLU), Alnarp, Sweden

PROFESSIONAL EXPERIENCE

Freelance Web Development, Seattle, WA, Front End Developer **2017 – Present**
- Recursive Thinking: built an interactive metrics dashboard in React with a serverless AWS back end (CloudFormation, Cognito, API Gateway, DynamoDB, S3, Lambda)
- Americans for Tax Fairness: built modular, data-driven infographics in HTML, CSS, and JavaScript

Neoscape Inc, Boston, MA, Art Director / Senior Digital Artist / Digital Artist **2006 – 2016**
- Directed image, film, and interactive visualizations for high-profile architects, developers, and Fortune 50 clients using raster and vector inputs
- Managed a team of 9 to 12 artists plus domestic and international contractors; developed office standards and pipeline tools across multiple software packages

Geller DeVellis Inc, Boston, MA, Graphics Specialist **2005 – 2006**
- Produced 2D and 3D visualizations of architectural and landscape concepts; improved 3D asset and texturing workflows

Michael Van Valkenburgh Associates (MVVA), Boston, MA, Project Landscape Designer **2002 – 2005**
- Used spatial data in AutoCAD to support planning and design; managed a $260,000 urban park design budget and coordinated multiple consultants

BDMD, Indianapolis, IN, Graduate Landscape Architect **2001 – 2002**
- Prepared concept and schematic design documents in AutoCAD
